# Salah El-Din Ibrahim

**Junior Network Engineer | NOC Engineer| Junior System Administrator**

**Alexandria, Egypt | zieds722@gmail.com | +201094074588 | LinkedIn**

## PROFESSIONAL SUMMARY

Communications & Electronics Engineering graduate with hands-on training in IT Infrastructure, Networking, Windows Server Administration, and Red Hat Linux Administration. Completed training programs in CCNA, CompTIA Network+, MCSA, and Red Hat Linux Administration I & II. Familiar with Active Directory, Windows Server, Linux system administration, SQL fundamentals, and network troubleshooting through practical labs and academic projects. Seeking a Junior Network Engineer, NOC Engineer, or IT Infrastructure Engineer opportunity to apply my technical knowledge and continue developing my professional skills.

## WORK EXPERIENCE & TRAINING

### CCNA Trainee

**CLS Learning Solutions, Nasr City, Cairo** **Jan 2026 – Mar 2026**

- Designed a fully functional multi-department enterprise network supporting 20+ end devices across 5 departments, improving network efficiency by (Engineering, Management, HR, Sales, Marketing)
- Architected IP addressing schemes using VLSM and subnetting, segmenting the network into 5+ optimized subnets
- Deployed OSPF dynamic routing across 3+ routers, achieving 100% route convergence and continuous network availability
- Configured centralized DHCP server, automating IP assignment for all 20+ devices and eliminating manual configuration overhead
- Implemented NAT/PAT and ACL policies to enforce security across 5 network zones and control internet traffic flow
- Secured 100% of remote management sessions using SSH across all routers and switches

### Technical Trainee

**Alexandria Electricity Distribution Company, Alexandria** **Sep 2023 – Sep 2023**

- Completed 1-month hands-on training covering PLC systems, industrial automation controls, and optical fiber communication
- Gained practical exposure to 2+ types of classic electrical control circuits used in distribution infrastructure

### Customer Service & Order Taker (Part-Time)

**Porto Golf Maintenance Company** **Jul 2022 – Sep 2022**

- Handled 50+ daily customer inquiries with high accuracy within a 3-person coordination team
- Maintained consistent service delivery speed during high-volume periods

## EDUCATION

**Alexandria Higher Institute of Engineering and Technology (AIET)**

Bachelor of Engineering in Communications & Electronics Engineering

## CERTIFICATIONS & COURSES

- CompTIA Network+
- CCNA:3 Modules: ITN, SRWE, ENSA
- MCSA : Windows Server 2019 / 2022
- Red Hat System Administration I,II (RH124&RH134)
- Databases: SQL Fundamentals
- T-SQL (Microsoft SQL Server)

## TECHNICAL SKILLS

- **Networking & Protocols:** TCP/IP, DNS, DHCP, OSPF, VLANs, VLSM/Subnetting, Routing & Switching
- **Network Security:** ACLs, NAT/PAT, SSH, STP, EtherChannel, HSRP, Firewall Concepts
- **System Administration:** Windows Server 2019/2022, Active Directory, Group Policy
- **Linux Administration:** RHEL 9, Users & Groups, File Permissions, Process Management, system
- **SQL Fundamentals:** (Create, Insert, Select, Delete, Drop, Truncate)
- **Productivity:** Microsoft Office Suite (Word, Excel, Outlook

## PROJECTS

### Enterprise Network Support Lab

- Designed Inter-VLAN routing across 4+ VLANs using multilayer switches with centralized DHCP and IP helper addresses
- Implemented OSPF dynamic routing between 3+ routers spanning multiple segments, achieving full route convergence
- Deployed STP, EtherChannel (2-link bundle), HSRP, and ACLs reducing single points of failure to zero
- Secured 100% of remote management using SSH across all routers and switches

### Linux Practical Lab Projects

- Performed basic system administration tasks including process, service, and file management in RHEL environment.
- Managed Linux users, groups, permissions, and ownership using useradd, usermod, chmod, chown
- Configured user password policies and account settings using chage and passwd commands

### Graduation Project: Multi-Purpose Reconnaissance Vehicle

- Designed a real-time radar detection system using Arduino Uno + ultrasonic sensor, covering a 180° scanning range
- Developed a graphical radar interface in Processing IDE visualizing object distance (up to 40cm) and angular position in real time
- Integrated 1 servo motor achieving 1° resolution across the full scanning arc

## CORE COMPETENCIES

Troubleshooting | Technical Documentation | Problem Solving & Analytical Thinking | Cross-team Communication | Time Management | Fast Learner & Self-Motivated

## LANGUAGES

Arabic English
